Block bottom bags

We have a wide range of block bottom bags. Block bottom bags are very suitable for packing chocolate, nuts and sweets as the bags remain standing up, due to the flat bottom and rectangular shape. Block bottom bags are also widely used for packaging luxury items and gifts. Below you will find a variety of block bottom bags we supply.

Block bottom bags with sealed bottom

Block bottom bags with sealed bottom are made of OPP 40 my, transparent (unprinted). Due to the sealed bottom, the bags are 100% leak-proof. A sealed bottom is stronger than a glued bottom.

Cross bottom bags with glued silver bottom cardboard

Cross-bottom bags with a glued-on silver bottom cardboard have a glued-on silver bottom cardboard at the bottom of the bag. This means you do not need to place a separate bottom cardboard in your cross-bottom bag. Thanks to the glued-on bottom cardboard, the bag remains upright and the packaged product is presented nicely.

Side-gusset bags

Side gusset bags feature side gussets and a sealed bottom. This makes the bags easy to fill by hand, but machine filling is also possible. The side gusset bag can be used both horizontally and vertically for various food products, such as chocolate, cookies, and candy. Use anti-condensation side gusset bags for packaging fresh vegetables. Side gusset bags are made from 30 my and 35 my OPP. Custom-made bottom cartons are also available in gold, red, and black.

Side-gusset bags

Side gusset bags can be filled either manually or by machine. Side gusset bags are suitable for packaging cookies, chocolate, and candy. Use a bottom cardboard insert for a sturdy base and even better presentation of your product.

Flat bags

We supply flat bags with a side seal and flat bags with a back seal. Flat bags are often used for packaging flat products, such as cookies, bars, and other food items. Flat bags are also ideal for packaging items such as cards or brochures.

Flat bags sideseal

Flat bags made of clear OPP or CPP with a thickness of 30 microns. Flat bags with side seams ensure an attractive presentation because no seal seams are visible.

Article number	Description	Packed per

Micro-perforated bread bags

Micro-perforated bags are polypropylene bags (PP bags) that are mainly used for packaging bread rolls and baguettes. Micro-perforated bags are designed to guarantee the quality of these products for as long as possible. Unlike regular plastic bags and packaging, micro-perforated bags have the unique property of being oxygen permeable, albeit in small quantities. Like all standard plastic bags, micro-perforated bags are available in various types, sizes, and designs, from small to large.

Microperforated vest type bags

Vacuum bags

Vacuum bags are bags that allow you to pack food safely and keep it fresh. Dijkstra Verpakking's vacuum bags are always 3-seal bags. As the name suggests, these are bags with 3 seams. They are made from a single piece of film and welded together.
The bags are extremely transparent, making the packaged product clearly visible. In addition, the bags are very sturdy. The side-sealed bags all have a thickness of 90 my.

Vacuum bags

Why choose vacuum bags from Dijkstra Packaging?

- Extremely transparent and sturdy
- A good water and water vapor barrier
- Good odor and aroma barrier
- Fast delivery
- Subpacked per 100 pieces
- Low prices
